Mimosa NearPoint for Microsoft Exchange Server wins "Product of the Year" in the Messaging: Backup and Recovery category by SearchExchange.com

NearPoint Earns Gold Honor for its Innovation, Ease of Use and Functionality

Santa Clara, Calif.—January 19, 2006—Mimosa Systems™ today announced that its NearPoint™ for Microsoft® Exchange Server was judged as the best Messaging: Backup and Recovery product released in 2005, in TechTarget's SearchExchange.com "2005 Products of the Year" awards.

Mimosa NearPoint™ was chosen from among 41 new products submitted for consideration to SearchExchange.com editors in three categories. The awards were judged by the editors of TechTarget's SearchExchange.com, in conjunction with a team of users, industry experts, analysts and consultants. Judges selected the Products of the Year among messaging products introduced, upgraded and shipped between September 30, 2004 and October 1, 2005.

Mimosa NearPoint is a next-generation software solution that addresses critical customer requirements around e-mail recovery, storage optimization, legal discovery and regulatory compliance. A comprehensive solution for e-mail information management, Mimosa NearPoint provides immediate mailbox and message recovery, disaster recovery, e-mail archiving and self-service search and access in one solution. By leveraging cost-effective storage, NearPoint also optimizes e-mail storage and reduces overall infrastructure costs.

One judge described Mimosa NearPoint: "This is truly next-generation data management for Exchange. With nothing installed on Exchange Server or Microsoft Outlook and seamless integration for backup, recovery, archiving and compliance, Mimosa stood out from the rest of the contenders in this category." The judges unanimously appreciated NearPoint's design specifically for Exchange Server's unique architecture.

"We are honored to receive the gold award as one of the best products in the Messaging category by such a respected industry publication and demanding team of judges. This award underscores the multiple benefits NearPoint delivers to the enterprise across the areas of archiving, backup & recovery, and compliance. This award lends credibility to our customers' choice of Mimosa NearPoint as the best solution provider to help them meet their multiple email data management challenges," stated Michael Ivanov, VP of Product Marketing, Mimosa Systems.

About SearchExchange.com

SearchExchange.com is the Web's best resource for administrators and managers of Microsoft Exchange and Outlook messaging applications. The site provides original news stories, technical tips, expert advice, and interactive features that help enterprise IT professionals select Exchange-related products and services, configure and install Exchange Server and Microsoft Outlook, and optimize performance in a cost-effective way. SearchExchange.com is the largest online source of Exchange Server e-newsletters, white papers and webcasts. More information can be found at www.SearchExchange.com.
