

Sr. Software Engineer, Applications

Role:

This individual will be responsible for the development of enterprise class thick client and web-based rich client applications for search, browse, discovery and complex work-flows for email management, compliance and legal discovery. Leverage Microsoft client and server side technologies to design and implement end-to-end applications.

Required Skills and Experience:

- Very strong problem solving skills, high creativity, and the ability to discuss advanced technical concepts at an abstract technical level.
- Extensive experience developing, delivering and supporting enterprise class applications addressing complex business requirements.
- 5+ years developing, and leading the development of, rich client and browser applications in multi-tier architecture with extensive use of complex and highly scalable and high performance database systems.
- Significant experience implementing complex browser-based applications and thick client applications with deep understanding of overall application architecture, data modeling, data management and data presentation.
- Ability to develop high-quality and advanced applications using C#, C++, .NET, JavaScript, XML, ADO, SQL and stored procedures.
- Must have deep understanding of key security concepts, including authentication, authorization, privacy, and non-repudiation.
- Strong understanding of performance and scalability.

Desirable Skills and Experience:

- Experience with Web Services, WCF, WPF, and other leading-edge Microsoft technologies.
- Email, MAPI, exchange and Active Directory.
- Knowledge of multi-tier, load balanced application environment.
- Having developed a Software Development Kit using webservice.

About Mimosa Systems
