## **BRESNAN COMMUNICATIONS SELECTS MIMOSA SYSTEMS' INTEGRATED CONTENT ARCHIVING SOLUTION TO PROTECT ITS INTERNAL EMAIL DATA**

### **Fast-Growing Telecommunications Firm Uses Mimosa NearPoint to Consolidate Rapidly Growing Exchange Database and Speed Information Discovery**

**Santa Clara, Calif. – August 26, 2008** – Mimosa Systems, a leader in Live Content Archiving solutions, today announced that Bresnan Communications has deployed the next-generation Mimosa NearPoint™ content archiving solution for rapid information discovery, retention, protection, and recovery of its vital internal email data.

According to the Telecommunications Industry Association, the worldwide telecommunications market is expected to grow at a 9.2 percent compound annual growth rate from 2008 to 2011. Bresnan Communications' internal Exchange database has been feeling the impact of the company's own impressive growth. In recent years, the database has grown at a rate of 30 to 50 percent per year.

"Our Exchange database was growing very rapidly, and we relied on tape backup for Exchange," said Martin Pickup, senior director of IT, Bresnan Communications. "End user performance was also taking a big hit. PST files were filed everywhere. That meant there was no universal way for employees to find email, making end-user and discovery searches very slow. This significantly increased our IT support calls, taking away valuable IT resources."

Bresnan selected Mimosa NearPoint for archiving its internal email data to improve storage, retention, and discovery processes, dramatically reducing the time IT and end users spend on content searches. With fingertip search and browse capabilities, users are now empowered to quickly access older email with a single click on the Mimosa Archive Folder, eliminating the need for IT intervention or user training, which saves both time and resources.

Pickup said that Bresnan's initial NearPoint installation was "straightforward and trouble-free," prompting the company to leverage the disaster recovery features of the software and consider failover Exchange servers at alternate data center facilities.

"The constantly accelerating growth rate in the telecommunications industry has dramatically increased the amount of content these companies are creating every day," said Christophe Culine, senior vice president worldwide sales, Mimosa Systems. "Bresnan Communications is the perfect example of a company that dealt with that

growth effectively and proactively, relying on NearPoint to optimize its storage management and improve data retention as well as efficiently retrieve archived data.”

### **About Bresnan Communications**

Bresnan Communications is a broadband telecommunications provider of leading-edge technology, entertainment, and advanced services for small and medium-sized markets. The nation’s thirteenth largest MSO, Bresnan currently serves more than 300,000 customers in Colorado, Montana, Wyoming, and Utah. Bresnan has always reached beyond cable’s traditional residential customer base, leveraging its broadband technology to provide custom high-speed data solutions to the business, education, government, and healthcare communities.

### **About Mimosa NearPoint**

Mimosa NearPoint addresses critical customer requirements around content archiving, eDiscovery, regulatory compliance, business continuity, and storage optimization in a unified solution. Mimosa NearPoint provides legal search workflow, immediate mailbox and message recovery, disaster recovery, email, instant message and file archiving, and self-service search and access in one solution. By leveraging cost-effective storage and advanced classification rules, NearPoint also optimizes content storage and reduces overall infrastructure costs.

### **About Mimosa**

Mimosa Systems delivers next-generation content archiving solutions for information immediacy, discovery, and continuity. Mimosa NearPoint is the industry’s most comprehensive unstructured information management software solution for email, files, and instant messages, enabling archiving, eDiscovery, storage management, and recovery in a unified solution. Mimosa is a Microsoft Gold Certified Partner, recognized for its competencies in networking infrastructure solutions, ISV/software solutions, and advanced infrastructure solutions. Mimosa is a privately held company whose investors include Clearstone Venture Partners, August Capital, JAFCO Ventures, Mayfield Fund, and Focus Ventures. Mimosa was founded in 2003 and is based in Santa Clara, California, with offices in Germany, the United Kingdom, Japan, China, Australia, and India.
