MIMOSA SYSTEMS DELIVERS LIVE ARCHIVING, RECOVERY, MAILBOX MANAGEMENT, AND MIGRATION FOR EXCHANGE SERVER 2007

Mimosa NearPoint Empowers the User-Driven Enterprise, Providing Fingertip Access to 2007 Microsoft Office System Content

Santa Clara, Calif. – November 30, 2006 – Mimosa Systems™, a leader in unified information management solutions for enterprise content, today announced that its Mimosa NearPoint next-generation e-mail archiving and recovery solution now enables eDiscovery, compliance, mailbox management and data protection for Microsoft Exchange Server 2007.

"Our business customers are looking for solutions that will help ensure their systems are always up and running and meeting compliance regulations," said Jeffrey Kratz, director, US ISV Organization, Microsoft. "Mimosa NearPoint's next generation archiving architecture combined with Exchange Server 2007 will help enable new levels of operational efficiency, information reliability and compliance for today's evolving business needs."

The Mimosa NearPoint email archiving and recovery platform offers Exchange Server 2007 customers the following key features:

- **Enterprise Compliance** –NearPoint integrates with new user-driven Exchange Server 2007 folder-level retention and additionally delivers centralized enterprise-wide policy enforcement for full corporate compliance.
- **Secure Self-Service Search** – NearPoint's intuitive search interface provides self service access to all current Exchange Server 2007 data and archived data, simultaneously.
- **Powerful eDiscovery** –NearPoint enables auditors and legal staff to quickly perform large and sophisticated search and discovery of all Exchange Server 2007 and archived items including emails, calendar entries and contacts.
- **Mailbox Management** – NearPoint Mailbox Extension supports new Exchange Server 2007 unified messaging data and allows for complete storage management.
- **Data Protection** – NearPoint uses a patent pending "off-host" Continuous Application Shadowing process for immediate recovery at the database, mailbox or message level.
- **Disaster Recovery** – NearPoint leverages the new database portability capability in Exchange Server 2007 to further simplify Disaster Recovery processes.

"Enterprise Strategy Group research estimates that organizations, from multi-billion dollar conglomerates to family owned businesses will archive over 7,000 petabytes of email over the next 4 years. One out of two organizations have to produce an e-mail as a result of a legal or regulatory inquiry. Utilizing intelligent e-mail archiving solutions can facilitate stringent processes for compliance, corporate governance and litigation readiness," said Brian Babineau, analyst, Enterprise Strategy Group. "Mimosa NearPoint is one of the most unique and comprehensive solutions available, delivering its customers with the insight and intelligence to archive and protect Exchange Server 2007 data."

—MORE—

"Mimosa empowers the user-driven enterprise and provides fingertip access to enterprise content with Mimosa's Live Content Archive for email, and other enterprise content," said T.M. Ravi, president and CEO, Mimosa Systems. "The combination of Mimosa NearPoint and the 2007 Microsoft Office system gives customers unparalleled capabilities for corporate governance, regulatory compliance and secure search of critical information that is reliably archived and just one click away."

About Mimosa NearPoint

Mimosa NearPoint addresses critical customer requirements around email information archiving, eDiscovery, regulatory compliance, business continuity and storage optimization. Mimosa NearPoint provides immediate mailbox and message recovery, disaster recovery, email archiving, and self-service search and access in one solution.
